DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Borden Mines Survey District is located less than one mile north of Frostburg. The town lies below a railroad embankment on a hillside sloping towards Jennings Run. Most buildings within the district are located on Borden Mines Road.

Three types of buildings are found in Borden Mine: Saltbox houses, duplex "block" houses and late 19th-early 20th century vernacular-styled dwellings.

The typical saltbox house is a 1½ story frame building with a stone foundation and a gable roof extended on the rear facade by a shed-roofed addition. The duplex "block" house is a 2½ story frame building with a stone foundation and a gabled roof with a central chimney. Vernacular-styled buildings in Borden Mines are typical 2 story frame structures with gabled roofs based on the ell plan. One building in Borden Mines is a 2 story structure covered with thick horizontal planks.

The ruins of the early 20th century George Tharp Mine are located at the northern end of Borden Mines Road. Most buildings within the district were damaged by a tornado in 1969.

STATEMENT OF SIGNIFICANCE

Borden Mines is a mid-19th century company town located in the northern end of the Georges Creek coal region of western Maryland. The town was constructed by the Borden Mining Company during the late 1890's. The company had deferred active mining operations pending the 1850 completion of the C&O Canal, a major outlet for Georges Creek coal. Prior to the opening of the canal the company's activities were directed towards the preparation of the Borden Mine on Big Savage Mountain and the construction of "...miners homes, tram roads, etc.".1

The Borden Mines Survey District includes most of the town. Associated historic sites not within the district include MHT-AL-V-A-011, AL-V-A-253, and AL-V-A-256.
